
PART V

ITEM 500 SPECIFIC INSTRUCTIONS FOR FORM COMPLETION SECTIONS A, B AND C (Continued)

SECTION A CARRIER INFORMATION (Continued)

14. COMMODITIES. Up to sixteen (16) commodities may be shown on a single tender. If a tender is to apply on 5 or less commodities, they will be listed in the spaces provided in Item 14, Section A, of the tender. However, if a tender is to apply on more than 5 commodities, **all of the commodities up to 16** will be listed in an "Appendix B" to the tender in the same format as Item 14, and the narrative "See Appendix B" will be entered on the first line of the description column in Item 14. Appendix B will contain the carrier SCAC and tender number in the upper right hand corner and will be inserted directly following Section C of the tender.

Beginning October 1, 2000, rail commodities will move from using the Uniform Freight Classification (UFC) tariff to Standard Transportation Commodity Codes (STCC). Non DOD-Unique STCCs are located in a list at the end of Item 500. At the present, not all UFC codes have been replaced by STCCs. These STCCs have been requested from RAILINC and will be published as they are available. Once these STCCs are published any request for new STCCs need to be made to HQ MTMC. Current tenders that contain UFC codes that do not have corresponding STCCs will need to be extended. UFC and STCC codes will be filed on separate tenders.

Commodities not assigned DOD unique commodity codes will be listed using the commodity numbers given in the Standard Transportation Commodity Codes (STCC) or the National Motor Freight Classification (NMFC). Indicate with an "X" in the space provided which classification is used or whether the commodities listed under Item 14 are covered by the DOD unique commodity codes shown later in these instructions. Only one type classification tariff may be used on any single tender. DOD unique codes, however, may be used in conjunction with commodities shown either in the NMFC, or STCC, subject to the released value provision in paragraph 15 of these instructions.

List the classification numbers of all commodities to be moved under this tender unless, as explained below, a DOD unique code has been assigned to the commodity. When applicable, the NMFC/DOD Unique item sub number contributing to the specific description must be shown in the spaces provided to the right of the hyphen. TOFC/COFC carriers will enter Rail STCC/DOD Unique commodity number(s)/code(s) covering material to be transported. No exception to the commodity description published in the classification will be accepted.

Carriers may identify commodities individually or by DOD Unique, or NMFC group (generic) headings. For example, Aircraft Group: NMFC item 011750. If a carrier elects to use a group heading, it will apply to all commodities listed under that group heading, with no exceptions. If a carrier wishes to limit the application to one or more individual commodities listed under a group heading, only the DOD Unique code number(s), sub number(s), and descriptions(s) for those individual commodities will be entered in item 14. Other than those commodities included in generic groups, groups of commodities will not be accepted. Those commodities must be listed individually. **STCCs do not have group codes.**

FREIGHT ALL KINDS (FAK) consist of those commodities which carriers offer to transport at one inclusive rate or charge regardless of their classification rating in the NMFC or STCC, or differing transportation characteristics. These commodities are described in the applicable MTMC Freight Traffic Rules Publication. Carriers filing FAK rates may not restrict the application of such rates by imposing any further commodity, density, or classification exclusions. The identification of one FAK commodity code in a tender precludes the listing of any other FAK commodity code in the same tender. Because of the unusual transportation needs of Department of Defense (DOD) material, the DOD unique codes shown below must be used in the

U99921	FAK, except Class A, B, C and Chemical Explosives and munitions	4622224 FAK, except Class A, B, C and Chemical Explosives and munitions

DOD unique rail and other than rail codes covering army tracked vehicle groups and individual tracked vehicles will replace all entries covering these commodities in the UFC and NMFC.

Direct Procurement Method (DPM) shipments of crated household goods and unaccompanied baggage can move under DOD unique Item 100240, Sub 01; DOD unique FAK Item 999912, Sub 01; and DOD unique FAK Item 999913, Sub 01. DOD unique Item 100240, Sub 01, replaces the corresponding item and sub in the NMFC and carrier may not require a bill of lading endorsement. **Air movements of DPM shipments will move under DOD unique codes of 999914 or 999931.** Because the DPM contractor's warehouse usually is not located at the military installation having responsibility for the DPM shipment, the origin must not be a military installation but should be either a City, State section, or State.

The "Description" field to the right of the classification number must be used to list an abbreviated narrative description of the commodity. If the DOD unique commodity item or the classification commodity item includes a released value, the released value must be included without change in the narrative description. In the event of a conflict between the abbreviated narrative description and the DOD unique description or the classification description, the DOD unique description or classification description will apply. To assist shippers, the narrative description for DOD unique FAK items 999912, Sub 01 or 999913, Sub 01 must indicate "includes DPM crated HHG and unaccompanied baggage."

If the tender offers carriage of bulk petroleum for non-guaranteed traffic, show in the space(s) provided in item 14, the appropriate DOD Unique Commodity Code(s) as shown on page 37. These Unique Codes are required for filing bulk fuel tenders. Carriers submitting bulk fuel tenders are to leave the Bulk Fuel Designator in item 14 blank. These Unique bulk fuel commodities will be subject to full common carrier liability and no entry of released value will be made in item 14 or 15, Section A of tender. When bulk petroleum commodities are being shipped, an "X" will be entered in the 10,000 pounds and greater space in Item 17, Section A.

Bulk petroleum shipments, if Guaranteed Traffic, are subject to carrier liability provided in MTMC Guaranteed Traffic Rules Publication (MGTRP) No. 50, Item 350.

SECTION A CARRIER INFORMATION (Continued)

15. RELEASED VALUE. This item has no application under Modes K, L or M. The following applies to the assignment of released valuation under the tender format: *(Note: Non-guaranteed traffic is*

PART V

subject to paragraphs a through e below for assignment of released value under the tender format and paragraph f applies to guaranteed traffic.)

- 16.
17. a. No exceptions or changes may be made to the released value assigned to the DOD unique commodity codes shown in Item 500, Section A, paragraph 14 of these instructions, or the released value assigned to commodities in either the NMFC or UFC. In addition, perishable subsistence, identified by DOD unique rail U99925 and other than rail code 999925, cannot be released in value. Carriers using the NMFC must ensure that both the proper item and sub number containing the desired released value amount are shown in Section A, Item 14, of the tender format. Rail carriers must ensure that both the proper Item and narrative description containing the desired released value amount assigned in the UFC are shown in the narrative description portion of Item 14 in Section A. Rail carriers will be governed by the released value shown in the narrative description portion of Item 14, while motor carriers will be governed by the released value contained in the item and sub number shown in Item 14. When commodity descriptions include released value as described in this paragraph, no entries will be made in Section A, Item 15, of the tender format.
18. b. Except as otherwise provided in these instructions, tenders containing other than DOD unique commodity descriptions for which no released value is provided in the NMFC or UFC, will be subject to full common carrier liability, unless the filing carrier completes Section A, Item 15. If a carrier wishes to limit its liability by completing Item 15, an "X" will be entered in the block provided along with a released value amount that is not less than \$2.50. The stated released value amount will apply only to those commodities listed in Section A, Item 14, for which no released value is provided in the NMFC or UFC.
19. c. Direct Procurement Method (DPM) shipments of crated household goods and unaccompanied baggage (DOD Unique Item 100240, Sub 01) will always be released to a value not exceeding ten cents per pound. When these commodities are being shipped, no entries will be made in Section A, Item 15.
20. d. When moving in haulaway or truckaway service, specific vehicles identified in Item 190 of the applicable MTMC Freight Traffic Rules Publication will always be subject to a released value not exceeding \$20,000 for each vehicle in the shipment. When these commodities are identified in Section A, Item 14, no entries will be made in Section A, Item 15.
21. e. Subject to the provisions of sub paragraphs 15a, 15b, and 15d above, commodities released in value may be published in the same tender with commodities not released in value.
22. f. Guaranteed traffic is subject to the carrier liability provided in MTMC Traffic Rules Publication 50, Item 350.

SECTION A CARRIER INFORMATION (Continued)

16. PARTS OF STANDARD TENDER INCLUDED. Enter an "X" in the appropriate spaces to indicate which sections (Section D, Section E, Section E-1, Section F, Section G, Section H, Section I, Section J, Section K, Appendix A, or Appendix B) are included in the tender. In addition to the "X" in the Section E space, carriers will enter an "X" in the space provided if either Table E (Rate Matrix) or Table F (Dromedary Service Rate Matrix) is included in the tender.
17. TENDER DISTRIBUTION (For administrative purposes only) Indicate with an "X" in the appropriate block. Carriers may indicate application for both only if the tender contains rates applicable to both categories. Carriers may distribute copies of accepted tenders to Department of Defense shippers.
